Top Sellers Pareto

Total Net Revenue (\$15.42M):

Driven primarily by Health & Beauty, Watches & Gifts, and Bed Bath Table. Revenue scaled aggressively through 2017 before stabilizing in 2018.

Revenue at Risk (\$6.17M):

37K churned customers spend identically to active customers (\$142 vs \$144 AOV). This points directly to a **retention/re-engagement problem**, not purchasing power.

Category Rating Bottlenecks:

Office Furniture and Home Comfort consistently receive the lowest rating scores—hypothesized to stem from logistics transit damage on oversized items.

Logistics CSAT Impact:

Delivery delays over 7 days cause review scores to crash to **< 2.1 stars** (vs. 4.21 stars on-time average). AL and MA suffer the platform's highest SLA breach rates.

Seller Concentration Risk:

Top 20% of sellers (619 out of 3,095) generate 82.69% of platform revenue — a textbook Pareto distribution confirming extreme seller concentration risk.

Strategic Recommendations:

- Launch win-back campaign targeting 37K lost customers
- Prioritize logistics SLA enforcement in AL and MA states
- Implement seller quality scoring combining revenue + delay rate + review score
